Profile Summary

Divya Mishra, an enthusiastic and hard-working professional with experience in web development and artificial intelligence. Skilled in Python, Flask, and NLP, Divya has demonstrated her abilities in project management and problem-solving. Her experience includes developing a distance learning website and a movie recommendation system.

Education

The Education section is well-structured with clear details about degree and grades. It would be more attractive to employers if there were any relevant courses or certifications that align with the job description.

Experience

The Experience section showcases relevant skills but lacks details on specific backend development tasks like working with PostgreSQL, Redis, Docker, etc. It would be beneficial to mention the experience in these areas if any, along with the results achieved.

Skills

While the Skills section showcases a variety of skills, it lacks some of the key skills mentioned in the job description such as Python (Flask or Django), PostgreSQL, Docker, etc. It would be beneficial to include these skills if you possess them.

Projects

The Projects section showcases good experience in Python, but it lacks the mention of RESTful API design and cloud deployment. It would be good to mention any experience related to these if any.

Certifications

This section is missing. If you have any relevant certifications, especially in Python, Flask/Django,

PostgreSQL, Docker, or any other skills mentioned in the job description, it would be beneficial to include them.

Additional Relevant Skills

Restful Api, Postgresql, Redis, Docker, Rabbitmq, Git, Github, Jira, Aws, Gcp, Kubernetes, Microservices Architecture, Open-Source Projects
